

TITLE

Fastener for Connecting Automotive Components and other Articles

5

ABSTRACT OF THE DISCLOSURE

10 Fasteners which are characterized by easy insertion and
extraordinarily difficult separation of items that they attach together. This is
achieved by snapping segments, which may comprise anti-opening and/or
anti-sliding portions, which immensely increase the strength with which the
fasteners hold the objects together. Vehicles comprising objects connected
15 together by the fastening devices are part of the instant invention.
